

## Aqualite®

The pocket sized Aqualite is a feature rich, all-purpose light that can be adapted to fit any dive situation. The light uses rechargeable lithium-ion batteries, offers 4 distinct power settings and interchangeable lamp heads.

The Aqualite is available in 2 models with different beam coverages. The Aqualite (90°) has a wide uniform coverage great for underwater video or photography use, whereas the Aqualite (20°) has a narrower, more focused and brighter beam. Use the 90° beam with wide-angle or fisheye type cameras like the GoPro. The 90° lamp head is now also available with a 395 nm Ultra Violet LED. The 20° beam is perfect for use as a primary dive light day or night.

### FEATURES

- **Available in 3 Configurations:**
  - 90° Lamp Head: Covers the area seen by most wide angle underwater video cameras (ex. GoPro).
  - 90° Ultra Violet Lamp Head: The same wide angle coverage as the traditional 90° lamp but with a powerful 395 nm Ultra Violet LED. Great for underwater video or discovering uv diving
  - 20° Lamp Head: Perfect for use as a primary dive light while combing the reef during the day for diving at night.
- **Variable Power:** The brightness can be stepped up from 120 to 600 lumens in 4 levels (Full, 1/2, 1/3 and 1/6) using the rear power dial and is held at a color temperature of 5000° K.
- Two ¼-20 threaded screw holes (1.2 inches apart) allow the Aqualite to be adapted to most underwater photo arms.
- Power is supplied by a lithium ion battery which is **charged from any USB power outlet** or the included wall socket adapter. **An additional battery is also included** so that one can be on charge while the other is out diving. *DO NOT use with disposable lithium 123 cells.*
- Low profile design keeps your setup compact and less likely to snag on other gear.
- Non-magnetic switching to prevent dive compass interference.
- Corrosion resistant HYDRALUM™ bezel acts as a heat sink for maximum performance underwater.
- The robust design throughout features double o-rings on the front and back rotary seals, anodized machined aluminum power head and rotary switch, high impact ABS anti-corrosion body and stainless steel thread attachments.

**Variable Brightness**  
 Full, 1/2, 1/3 and 1/6

**1/4-20 Mounts**  
 Easily Attaches To Most Camera Arms

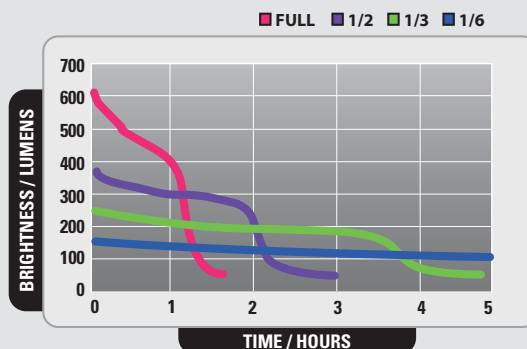

**USB Charger**  
 Charges from included wall adapter or any USB power cord
