### PROFESSIONAL SOUND QUALITY

FUSION's Sound-Panel combines a pair of custom 4" speaker drivers, silk dome tweeters, and a large-surface bass radiator inside a perfectly-tuned enclosure, delivering professional sound quality in a shallow-mount form-factor.

With a maximum mounting depth of 41mm (1-5/8"), the Sound-Panel solves the age old problem of delivering quality audio reproduction from a shallow mounting cavity installation.

### IP65 WEATHERPROOF

The front and rear of the Sound-Panel is rated IP65 for water and dust ingress protection. It also meets industry standards for UV and salt fog protection. This makes it perfect for indoor or outdoor installation on any vessel in the harsh marine environment.

## KEY FEATURES

### VERSATILE MOUNTING SOLUTIONS

The Sound-Panel is designed for easy installation. Both the left and right speaker wires from the source unit or amplifier only need to be wired to one location for connection, saving time and money.

The Sound-Panel has four mounting options available to create a professional indoor or outdoor installation. The 41mm (1-5/8") spacer allows you to install directly onto any flat surface with no mounting cut-out required.
