FOR THOSE WHO ENJOY THE FINER THINGS IN LIFE

Introducing high-end audio for the marine cabin environment, designed for exceptional sound in any vessel. This now represents the highest quality purpose-built marine audio equipment from FUSION.

Carefully designed and manufactured specifically for use in a marine environment, whilst maintaining superb sound quality.

The FUSION MS-BX3020 features a 3" Bass/Mid speaker, with a waterproof paper cone, and a fluid cooled fabric dome tweeter. Constructed with a magnet system that produces high efficiency from a small box.

FAMILY, FRIENDS, FUSION

It's what boating is all about.

CONTENTS OF THE BOX:

2 x Speakers

2 x Fully tinned speaker wires

2 x Mounting Brackets

4 x Mounting knobs and washers

4 x Stainless Steel Mounting Screws

Manual

Warranty Card

SPECIFICATIONS

Woofer Size: 3"

Cone Material: Waterproof paper

Tweeter Type: Fabric Dome

Box Type: Sealed, ABS

Peak Power (watts): 100

Efficiency (1W/1M): 85 db

Frequency Response: 200 Hz – 20 kHz

Impedance: 4 ohms

DIMENSIONS Length 164mm 6-15/32"

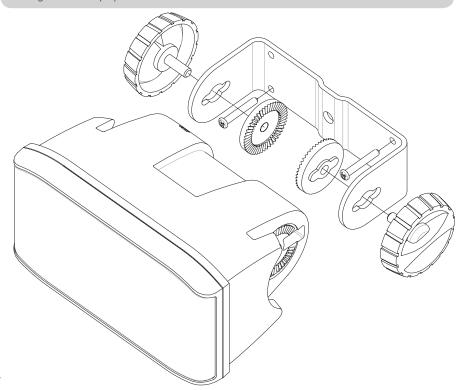

Width 90mm 3-17/32"

Depth 112mm 4-13/32"

INSTALLATION GUIDE

- 1. Check mounting position for adequate space (see caution)
- 2. Place the mounting bracket in position, then mark and drill mounting holes.
- 3. Place the mounting bracket and affix with supplied screws.
- 4. Connect the wires from the source unit to the cabin speaker ensuring the correct polarity is observed.
- 5. Attach the cabin speaker to the bracket using the washers and mounting knobs supplied.
- 6. Adjust the angle of the speaker to the preferred position before tightening the mounting knobs.

CAUTION: For speaker mounting restrictions related to Magnetic interference, please refer to the manufacturers recommendations for any navigational equipment.

INSTALLATION TIPS

Any speaker will only perform to its best capabilities, when correctly placed in the listening area. FUSION Engineers recognise that unlike a home or motor vehicle installation, there are an extremely wide range of marine environments where speakers may be placed.

FUSION MS-BX3020 full range marine speakers are optimised and tuned to work perfectly with the MS-AB1060R Active Subwoofer with a 2 channel speaker amplifier which not only powers the speakers but also adds impressive low end to the audio experience, a little thought and care with placement of the speakers will result in better sound.

- High frequencies are directional. Placing the speakers low down in the boat will lose some of its information.
- Speakers should be placed to simulate a "sound stage", by being placed where you are able to hear both speakers in a stereo situation.

TROUBLESHOOTING

Before you contact your FUSION dealer or service centre, FUSION requires that you do some simple troubleshooting to help diagnose or resolve the problem.

PROBLEM	SOLUTION
No Sound	Check all connections from the source unit amplifier to the speaker terminals are connected correctly.
System lacks in bass	Check the connections from the source unit/amplifier to the speaker. Check Polarity.
System lacks in high frequencies:	Check Polarity Check the bass / treble control settings on the source unit.
Distorted sound	Check all wiring Check that it is not the surrounding panels of the craft rattling. Check connections from the source to the speaker.
